

K+G MACHINERY WORKS LTD

KGTEC100 STANDARD LEAK TESTER

- Precision adjustable test head
- Active or passive choke neck
- Holes down to 0.008"
- Additional options:
 - Vacuum conveyer
 - Bottle height check
 - Fall down detection
 - And more

The KGTEC100 is a state-of-the-art leak tester from K&G, designed for easy setups and simple changeovers. It stands out for its ability to save and recall 'recipes', making it user-friendly and efficient. The device is capable of detecting leaks as small as 0.008", ensuring the highest quality control for your products. With automatic self-testing, the KGTEC100 guarantees that only top-quality bottles reach your customers.

The KGTEC100 is equipped with a range of features including a Touchscreen HMI, adjustable height from 38"-60", recipe storage, and precision adjustable test head height. It offers continuous or start-stop operation, catering to different production needs. Additional options such as Fall Down Detection, Choked Neck Detection, Line Backup detection, under conveyor mounting, side transfer, and Dead plates can be added for enhanced functionality. The device also provides various conveyor options, available in 3" or 6", with or without vacuum, to suit different production lines.

Specifications

Power Requirements: 1ø 120VAC 10A
